The image shows a Scratch script with three code blocks:

- A green 'when green flag clicked' block.
- A teal 'if-then' block with the condition 'n = 5' and the action 'show grid'.
- A teal 'if-then' block with the condition 'n = 6' and the action 'show grid'.
- A partially visible teal 'if-then' block at the bottom.

The 'show grid' blocks are blue and contain a 5x5 grid of squares. The second 'if-then' block and its corresponding grid are highlighted with a yellow border. A mouse cursor is visible over the center square of the 6x6 grid.
